

Official GED Practice Test

Mathematics Part II

Tests of General Educational Development

Directions

The Mathematics Test consists of multiple-choice questions intended to measure general mathematics skills and problem-solving ability. The questions are based on short readings that often include a graph, chart, or figure.

You will have 23 minutes to complete the 13 questions in this booklet. Work carefully, but do not spend too much time on any one question. Be sure you answer every question.

Formulas you may need are given on page 4. Only some of the questions will require you to use a formula. Not all the formulas given will be needed.

Some questions contain more information than you will need to solve the problem; other questions do not give enough information. If the question does not give enough information to solve the problem, the correct answer choice is "Not enough information is given."

The use of calculators is allowed.

Do not write in this test booklet. The test administrator will give you blank paper for your calculations. Record your answers on the separate answer sheet provided. Be sure all information is properly recorded on the answer sheet.

To record your answers, fill in the numbered circle on the answer sheet that corresponds to the answer you select for each question in the test booklet.

FOR EXAMPLE:

If a grocery bill totaling \$15.75 is paid with a \$20.00 bill, how much change should be returned?

- (1) \$5.25
- (2) \$4.75
- (3) \$4.25
- (4) \$3.75
- (5) \$3.25

(On Answer Sheet)

The correct answer is "\$4.25"; therefore, answer space 3 would be marked on the answer sheet.

Do not rest the point of your pencil on the answer sheet while you are considering your answer. Make no stray or unnecessary marks. If you change an answer, erase your first mark completely. Mark only one answer space for each question; multiple answers will be scored as incorrect. Do not fold or crease your answer sheet. All test materials must be returned to the test administrator.
