

Official GED Practice Test

SCIENCE

Tests of General Educational Development

Directions

The Science Test consists of multiple-choice questions intended to measure general concepts in science. The questions are based on short readings that often include a graph, chart, or figure. Study the information given and then answer the question(s) following it. Refer to the information as often as necessary in answering the questions.

You will have 40 minutes to answer the 25 questions in this booklet. Work carefully, but do not spend too much time on any one question. Be sure you answer every question.

Do not mark in this test booklet. Record your answers on the separate answer sheet provided. Be sure that all requested information is properly recorded on the answer sheet.

To record your answers, fill in the numbered circle on the answer sheet that corresponds to the answer you select for each question in the test booklet.

FOR EXAMPLE:

Which of the following is the smallest unit in a living thing?

- (1) tissue
- (2) organ
- (3) cell
- (4) muscle
- (5) capillary

(On Answer Sheet)

The correct answer is "cell"; therefore, answer space 3 would be marked on the answer sheet.

Do not rest the point of your pencil on the answer sheet while you are considering your answer. Make no stray or unnecessary marks. If you change an answer, erase your first mark completely. Mark only one answer space for each question; multiple answers will be scored as incorrect. Do not fold or crease your answer sheet. Return all test materials to the test administrator.

DO NOT BEGIN TAKING THE TEST UNTIL TOLD TO DO SO
