

“For those who favor adventure, and for those who live to expand their world beyond their own four walls, Field Study classes are not only relevant, they are mandatory.”

- Former RRCC Geology Student

GEOLOGY ROCKS!

AT RED ROCKS

Field Trips

Nearly all of our courses incorporate field trips as a key part of the educational experience.

We even offer extended Field Courses that provide the opportunity for in-depth exploration of geologically exciting places such as the Big Island of Hawaii.

“There were moments on this excursion that literally took my breath away, causing my eyes to widen in disbelief, until I reminded myself of how to breathe again.”

- Former RRCC Geology Student
